Step 1
First, gather the supplies you need. You will need a juice carton, brown and red paint, a box cutter, a hot glue gun, scissors, four bamboo skewers, brown foam or felt and a hole punch.

Step 2
Cut out one side of the juice carton all the way around with the box cutter.

Step 3
Paint your boat with the brown paint and let dry. Take the hole punch and punch three evenly spaced holes on each side of the boat. These holes will be used to hold your oars. Cut out a small dragon head out of the felt or foam and glue to the front of your boat.

Step 4
Cut out square flaps of felt or foam and fold them over the glue to three bamboo skewers.

Step 5
Push the bamboo skewer oars through the holes in your boat. Once they are all in place you can cover the other end of the skewers with the square oar flaps and glue.

Step 6
Cut out a rectangle from the leftover juice carton and use the red paint to make stripes on your sail. Let dry.

Step 7
Glue a bamboo skewer to the back of your sail and glue that skewer to the middle oar and bottom of the boat. Hooray, you made an amazing Viking ship! You are ready to set sail!
